

Kegan Myers

call: 314-467-0179

email: kegan@keganmyers.com

Key Skills

Languages: Javascript, SQL, HTML, Sass/Less (CSS), Bash, Go, Python

Frameworks/Libraries: Node.js, Express, React, Redux, Knex

Technologies: Docker, Nginx, Cloud (AWS, GCP), Container Orchestration, Prometheus, Virtualization (VMWare KVM), ELK, Networking, Linux (Ubuntu), RabbitMQ, Redis, PostgreSQL, Mongo, Heroku

Working Experience

WWT/Asynchrony Labs - Developer

August 2016 - Present

Develop and deliver quality software into production environments.

- Worked with client to bootstrap their team, practices, and technology. We worked together to deliver an application in react + redux and express into rancher container environments hosted on AWS infrastructure created through terraform.
- Assisted team using react + redux, go, and the TICK stack to gather metrics and create a custom monitoring software product.

terrible.solutions LLC - Owner

April 2016 - Present

Provide consulting and contract-based development.

- Worked with a startup on their social calendar application.
- Developed custom software integration for an athletics league.

The LaunchCode Foundation - Developer

December 2014 - April 2016

Used agile methodologies to migrate to a tested and reliable system, that powered Job and Education initiatives across the United States.

- Built and maintained a customized CRM, and migrated data from spreadsheets.
- Moved codebase towards microservice architecture.
- Set up and maintained cloud infrastructure, saving thousands vs. AWS annually.
- Prototyped graph-based curriculum building application.
- Designed and implemented network for 100s of devices with custom captive portal.

Pushup Social - Developer

September 2013 - November 2014

Developed a prototype personal social network into a product ready for sale.

- Migrate server-side code to a single page application in TypeScript and knockout.js.
- Maintained API microservices and re-wrote image processing service using node.js.

Cybercon - SMC Staff

May 2012 - June 2013

Provided frontline support for cloud and colo customers in a datacenter environment.

Volunteer

Code Until Dawn - Organizer

June 2014 - October 2016

A monthly meetup with over 1,000 members that promotes the coding community in St. Louis through a monthly social event with an informal atmosphere in which we actually "Code Until Dawn".

- Coordinate venue, food, refreshments, and sponsorship.
- Provide ad-hoc mentorship to attendees seeking to learn to code

CodeCause - Co-Founder

July 2014 - November 2014

An organization aiming to provide novice coders with real-world experience, and to use their skills and passion to do good for their community.

- Act as a technical advisor for inexperienced coders.
- Provide overall technical guidance to the organization.

LaunchCode CS50x - Mentor

January 2014 - April 2014

LaunchCode's first educational program, which helped over 100 people learn to code using Harvard's CS50x curriculum.

- Create and deliver introductory-level talks on web technologies including NoSQL databases and node.js.
- Provide assistance to students completing problem sets.
